<p>Leave Behind Narcan Authorization</p>	<p>This is great. Thank you.                      I have 2 additional thoughts:</p> <ol style="list-style-type: none"> <li>1. Add a #8) to <b>restock</b> the rig with other supplies</li> <li>2. Could we offer an <b>incentive</b> to the teams, drivers, agencies? Would \$50 to sign up and \$25 per event ( to the agency, team, rig) up to 6 doses ( \$200)?—                             <ol style="list-style-type: none"> <li>a. We could probably get a grant, or do a fundraiser/GoFundMe etc?</li> <li>b. I think after \$200, this will probably be a good initiation. Judging from the mailing list it might be as much as \$80,000, probably less.</li> </ol> </li> </ol> <p>Submitted by: Dr. Andy Coren 12/6/2022</p>	<p>We don't typically offer payment incentives for patient care (or prevention) and the EMS Agency doesn't have a budget to support an incentive program. I agree that both counties would decline a go fund me effort and I think field providers naturally want to help get more Narcan into the hands of users and their families based on current call volume.</p> <p>Response sent 12/6/2022, Jen Banks</p>
